REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record teaches compositions of sulfuric anhydride (SO_3) in ketones such as acetone. However, the examples in the instant specification demonstrate that such prior art compositions made in a conventional manner are actually different from the claimed composition. In particular the prior art compositions appear to contain contaminants that will form a scale over time that is not present in the instant composition of matter. That is, the instantly claimed composition is different from the prior art compositions and necessarily is novel there over. Since there is no indication in the prior art that the prior art compositions could or should be modified in a manner to eliminate these contaminants it cannot be suggested that such a modification would be obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
